

## Even More Absorbers

### Studiofoam® Wedgies™

Wedgies are 1' squares of 2" thick Studiofoam and are a great solution for spot treating studios, home listening rooms, iso booths and more. With slightly more wedges per square foot than 2" Studiofoam, Wedgies feature maximized surface area for greater exposure to sound waves.

Wedgies are a great solution for small flutter echo problem areas and, when spread apart a little bit, yield beneficial diffusion off their exposed edges. A famous designer used Wedgies and called to tell us they were even more effective than he'd hoped they'd be, so you know you can trust them to tame your space!

### Sonomatt™

The perfect product for the budget-conscious, yet acoustically-discerning, customer. Sonomatt is cut in the industry standard "eggcrate" style to keep its price low & absorbs almost as well as 2" Studiofoam Wedges, but it still outperforms competing "premium" brands that cost way more!

Due to the manufacturing process we use, Sonomatt's dimple pattern will not be square to the edges of the panels, so installing them side by side may not be advised from a visual consistency standpoint.
